Nesting Habitat Available

Our vineyards are surrounded by native oak woodlands and chaparral ecosystems. Due to the native habitat surrounding the vineyards we also have high levels of duff on the ground as well as cavity holes in dead trees.

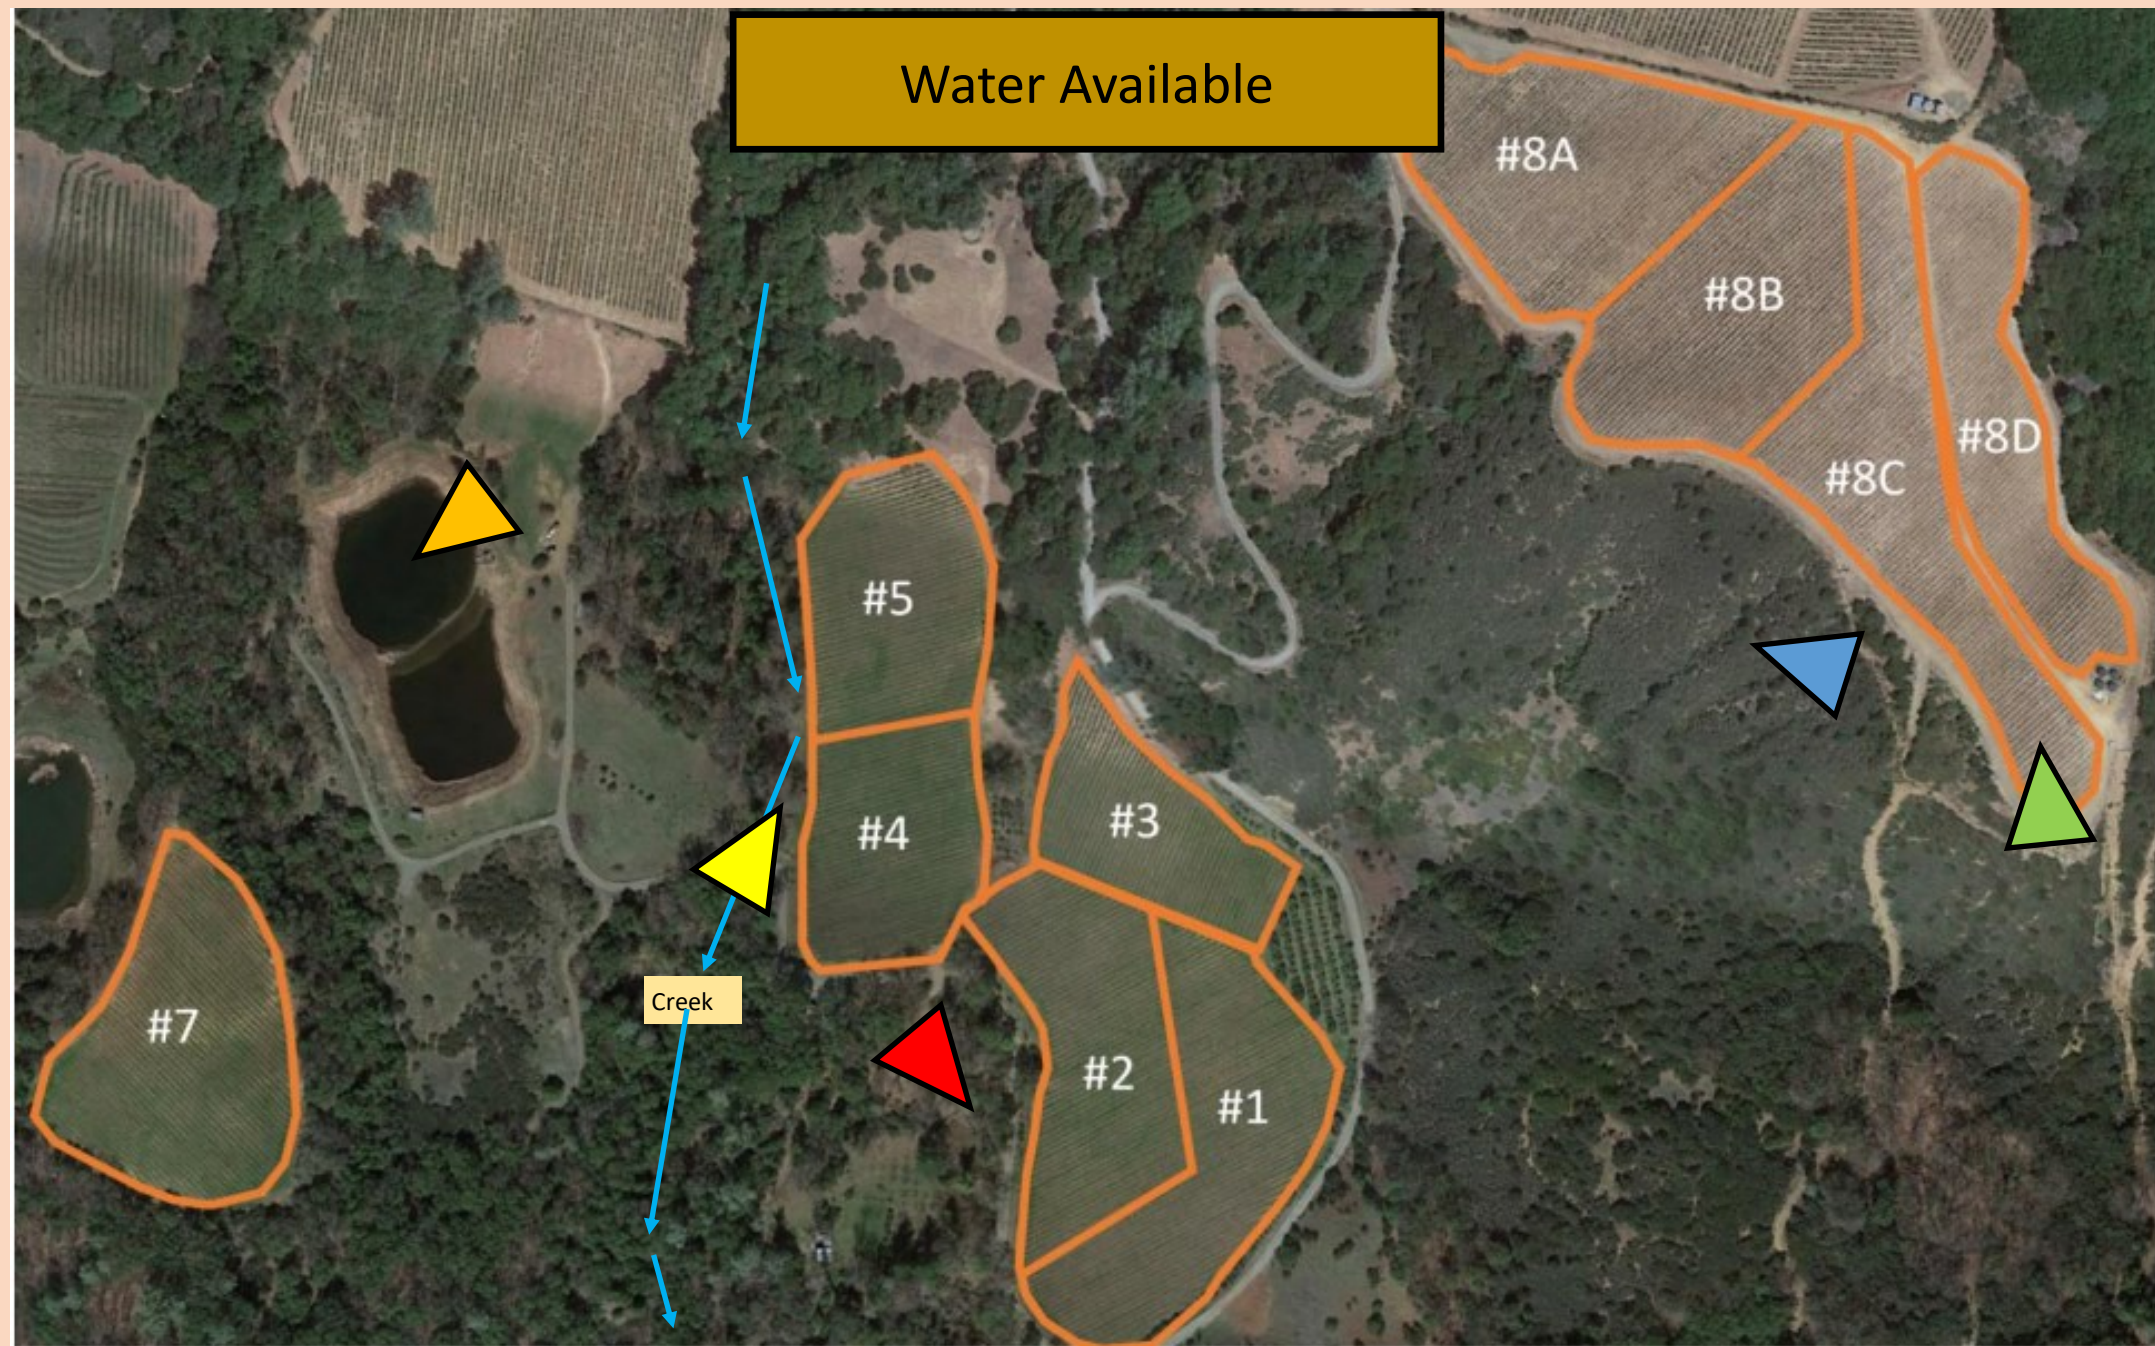

Forage Available

Orchard with apples, pears and figs.

Madrones throughout property

Chaparral ecosystem consisting of coyote brush and manzanitas which provide forage in spring and fall

Natural springs pushing up

Seasonal creek (Dec-May)

Ponds

Irrigation year round
