Ponds at our other facility and the Russian River within a mile of the property.

Seasonal Creek bordering north end of property

Seasonal Creek bordering south end of property

Forage Available

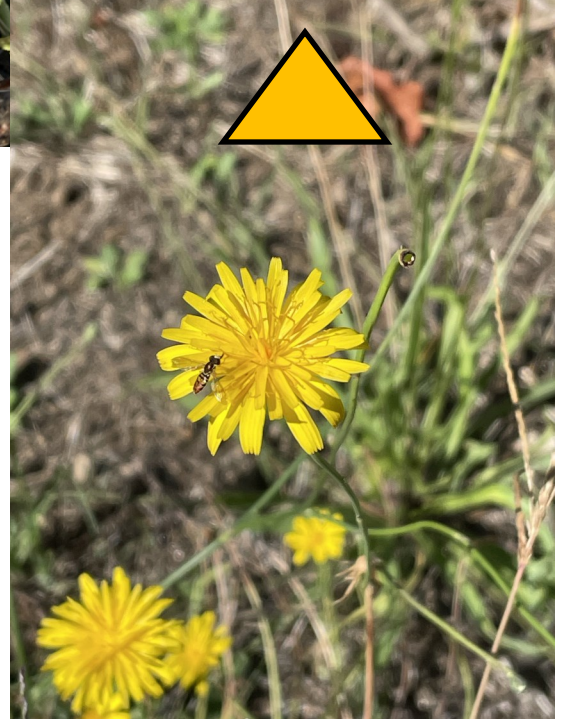

Madrones

Toyons

Calif. Bay Laurel

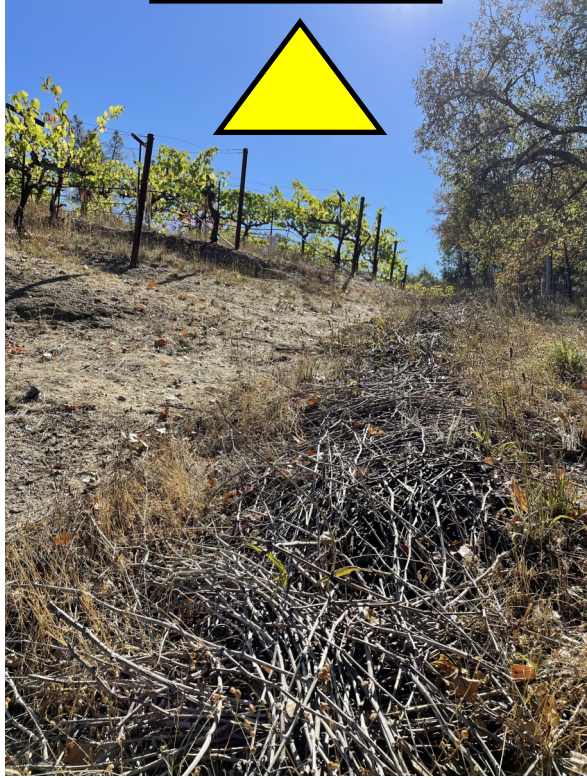

Our surrounding habitat is also full of oak species as well as native understory plants.

**Nesting Habitat Available**

Woody debris pile

Our vineyards are surrounded by native oak woodlands with some pine trees mixed in. Due to the native habitat surrounding the vineyards we also have high levels of duff on the ground as well as cavity holes in dead trees. There is also ample open dirt spaces for ground nesting in and around the vineyard.
