

# POLLINATOR PARTNERSHIP

Protecting Pollinators, People, and the Planet

**POLLINATOR  
PARTNERSHIP**

Protect their lives. Preserve ours.

**Pollinator Partnership** is the world's largest nonprofit dedicated exclusively to the health of pollinating animals. Since 1997, we have championed the vitality of pollinators, critical to our food and ecosystems, through conservation, research, education, and collaboration.

## WHY POLLINATORS?

Pollinators are the bees, butterflies, birds, and other animals that help agriculture produce an estimated **1 out of every 3 bites of food we eat**.

Pollinators are in dire trouble, largely due to loss of habitat. The result? Unstable global food supply, unhealthy ecosystems, and dramatic loss of biodiversity.

**Everyone's life depends on pollinator health and everyone can play a role in protecting them today.**

85% of all flowering plants on the earth need help from pollinators to reproduce.

Pollinators and their habitat help reverse the impacts of climate change.

Pollinators add \$217 billion dollars annually to the global economy.

We lose 175 acres of farmland and habitat every hour, or 1.5 million acres per year, roughly the size of Delaware.

# POLLINATOR PARTNERSHIP'S PROVEN STRATEGY

**POLLINATOR  
PARTNERSHIP**

Protect their lives. Preserve ours.

## Build Habitat

Our Bee Friendly Farming™ program has certified 130,000 acres of habitat in one year alone.

## Conduct Break-Through Research

Pollinator Partnership conducts primary research and has also distributed more than \$1 million in grants.

## Empower Everyone to Act

Our Monarch Wings Across America™ program has trained more than 1,000 volunteers, resulting in 100,000 acres of enhanced habitat.

## Create Lasting Change Through Collaboration

Pollinator Partnership manages the North American Pollinator Protection Campaign, a collaborative of more than 170 diverse member organizations.
