

MONARCH HABITAT MANAGEMENT AND TECHNICAL TRAINING WORKSHOPS

These symposium style workshops will provide technical assistance to public land managers and private land stewards working within the Eastern Broadleaf Forest-Continental Province who are engaged, (or are interested in becoming engaged), with monarch habitat planning, creation, restoration, and long-term management.

Workshops include:

- A comprehensive review of best management practices and targeted recommendations for management actions
- Presentations by practitioners recognized for their expertise and approach to monarch habitat planning and implementation, including site preparation, integration, and long-term management
- Site walk through exemplary monarch habitat project areas
- Group discussions
