

CULTIVATING A FUTURE FOR US ALL

Bee Friendly Gardening (BFG) encourages and supports pollinator-friendly practices across North America's public and private gardens and landscapes. These landscapes provide essential habitat to bees and other pollinators, a critical component of a healthy tomorrow. By becoming a BFG Member, you will have to access resources and to the growing network of individuals who make a difference for pollinators, people, and the planet.

AN INITIATIVE OF

**POLLINATOR
PARTNERSHIP**
