

# BEE FRIENDLY GARDENING

Bee Friendly Gardening helps people play a bigger role in the health of pollinators and the planet. Over 85% of North American households have an outdoor living space; by converting some to much-needed habitat, together we can have a big impact. Your space can provide support to pollinators and other wildlife - no lawn, garden, balcony or window box is too small! When you join BFG you will receive access to a suite of Member benefits as well as a supportive, inspirational community of fellow Bee Friendly Gardeners. We hope you will join us today!

 [pollinator.org/bfg](http://pollinator.org/bfg)

Be among the first residents to sign up for BFG and receive a free one year membership!

\*You will be billed \$20 USD annually after the first year; you can opt out any time.
