

# Pollinator Habitat Heroes

*Help Pollinator Partnership raise awareness and inspire others through the process of storytelling!*

## Habitat Heroes Project

**Pollinator Partnership** is a non-profit whose mission is to promote the health of pollinators, critical to food and ecosystems, through conservation, education, and research. We are looking for conservation success stories for our Habitat Heroes project, a video and blog series to highlight agricultural producers and landowners who have received technical or financial support through a Farm Bill Program (EQIP, CSP, CRP, etc.) to install habitat or adopt practices that support pollinators and other wildlife. We are interested in hearing from urban, traditional, specialty crop farmers, and other producers who want to share their experiences to help others in the agricultural community understand what's possible on their lands and inspire them to explore assistance programs to achieve their own conservation goals.

If you feel you have a success story to tell and want to be considered for this project, please fill out our **Habitat Heroes Questionnaire**. Pollinator Partnership is excited to learn more about you, your operation, and your conservation practices. Once submissions are reviewed, we will be in touch to discuss next steps. Depending on the number of responses received, Pollinator Partnership may not be able to interview everyone, but we will seek to feature as many stories as we can!
