

Pollinator Partnership Spotlight

## Pollinator Week 2022 – resources, event map and ways you can participate

[Pollinator Week 2022](#) is less than one month away! I hope that you will join us as we celebrate pollinators, raise awareness for their conservation and health, and work together to protect them. Here are some ways you can support our pollinators or join in on the fun during Pollinator Week:

- Plan your activities and add your events to the official Pollinator Week Map at <https://www.pollinator.org/pollinator-week/activities>.
- Use the official Pollinator Week Toolkit to help you celebrate and promote your involvement in this year's #PollinatorWeek: <https://www.pollinator.org/pollinator-week/toolkit> or download resources here: <https://www.pollinator.org/pollinator-week/pollinator-week-resources>
- Take part in the Pollinator Week Bioblitz on iNaturalist and help collect data on the distribution of pollinators across North America at <https://www.inaturalist.org/projects/pollinator-week-2022-pollinator-bioblitz>
- Do you know any landowners who are interested in enhancing pollinator habitat on their land? Please share the Wisconsin Women in Conservation event happening during Pollinator Week:

### Enhancing Pollinators: Bees, butterflies & more!

WiWiC Conservation Summer Camp  
Thurs. June 23, 2022 (virtual)  
12-1 pm CST

We're buzzed up talking about pollinators this session, digging into what you can do to increase the population of bees, butterflies, beetles and why pollinators are so vital to creating and maintaining a healthy habitat and ecosystem. Learn about identifying what pollinators are already on your land along with resources to increase the population.

Register & more info here:
